

HELP US GROW

Hello Systems Friends and Family,

Spring has finally arrived and we are ready to roll our sleeves up and get to work on something great.

Every year, our Systems Unlimited day program has a small vegetable garden.

With this garden, people in our services:

- ☀️ Gain the skills to grow their own food
- ☀️ Produce from the garden is used for our cooking classes
- ☀️ Excess vegetables will be donated to Systems homes that have limited finances for healthy foods

While this garden is much loved, it is not accessible to people with wheelchairs or walkers. Due to this, many people in our day program are unable to enjoy it or learn the life skill of gardening.

This is where **YOU** can help!

With your donation, a bigger better more accessible garden will be made for everyone in our day program to enjoy.
